Bekaert High Tensile Technology

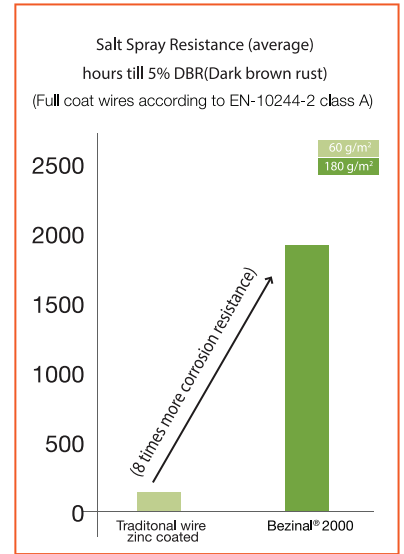

Bekaert's high tensile wire used for its fences ensures more than 1.5 times longer fence, 40% less posts and less sagging compared to conventional fence

Bezinal® 2000 coating for long lasting corrosion protection

The wire of Duron agriculture fences are coated with Bezinal® 2000, a coating developed and produced exclusively by Bekaert. This Coating will considerably improve the corrosion resistance of your fence compared to fences that use galvanised wires. As a result, the fences have a guarantee for 20 years on its coating, provided proper installation and use.

What makes Duron Fixed Knot Fences special?

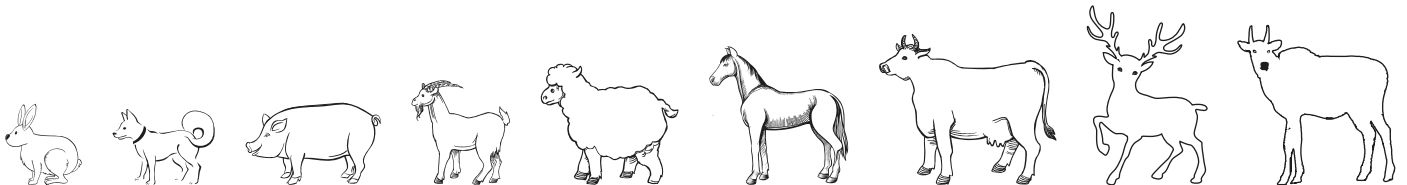

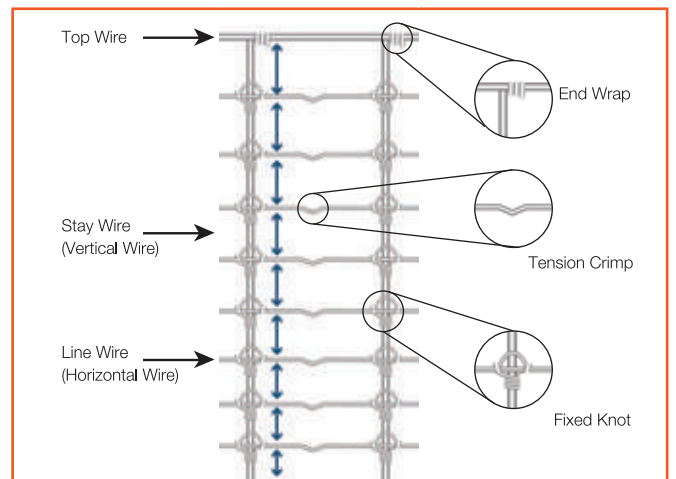

- ☒ Bezinal® 2000 coating imparts 8 times more atmospheric corrosion resistance against conventional zinc coating
- ☒ High strength of fence allows distance between poles from 15 - 20 feet as compared to 8 - 10 feet in convention fence
- ☒ High strength non slipping knots at each crossing versus woven mesh in conventional fence
- ☒ 2 times harder to cut the high tensile wires as compared to conventional fence
- ☒ Does not unravel
- ☒ Uniform crimping allows fence to come back to retain its shape after impact
- ☒ Increasing mesh size from bottom to top
- ☒ Can be installed on Steel (Angle or Tube), Concrete, Stone and Wood posts
